

1)

- voters (eligible to vote, first-second vote, Assign constituency, ...)
- federal state (number of people eligible to vote)
- politicians (passive vote, assign constituency, Assign party, Assign list, ...)
- lists (Assign federal state, Assign politicians, Assign party)
- party (assign politician, Assign list)
- constituency (population, Assign politicians, Assign voters, ...)

2)

Advantages	Disadvantages
standardization of data/systems	Single Purpose SW probably more efficient
Centralized data storage guarantees latest results	Security issues with centralized storage
Centralized data storage simplifies access	DB has to be changed if electoral system changes
	Queries always on whole dataset

3)
